IN THE CLAIMS:

Claim 8, line 11, "recieved" has been changed to –received--.

Claim 14 has been amended as follow:

14. (Currently Amended) The method as claimed in claim 9, wherein the calculating of the equalization error values in the blind mode comprises:

outputting the [input] <u>stored</u> kth field synch signal as a predetermined level <u>from</u> <u>a decision unit</u>; and

adding the [input] kth field synch signal and the <u>output</u> stored kth field synch signal of the predetermined level stored kth field synch signal <u>of the predetermined</u> <u>level</u> outputs from the decision unit to calculate the equalization error values.

2. The following is an examiner's statement of reasons for allowance: a method and apparatus for equalizing a single carrier signal are disclosed. The closest prior art,

Applicant's admitted prior art fig. 4, discloses a similar method and apparatus. However the admitted prior art does not teach or fairly suggest, in combination with the other claims limitations the limitations, the limitations of "a field synch storage unit which stores a kth field synch signal of the extracted field synch signal, wherein k is a natural number; and an error calculator which N times repeatedly uses the kth field synch signal and calculates equalization error values, wherein the filter unit uses the equalization error values to update coefficients of the filters", recited in claim 1 and corresponding limitations recited in claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
